## Powerful High Bay LED Luminaires

### **SAVE ENERGY**

In the past, industrial lighting solutions were designed to fulfil one task only: Enable visibility in a working environment to make it somewhat safe. Upgrading to the LED iBond ATRIUM is easy and quick - all wiring comes preinstalled, and most existing fixing points can be used. And ATRIUM is very energy efficient. It delivers lots of high quality light and reduces your energy bill at the same time.

### **NO MAINTENANCE**

Our patented technology ensures unsurpassed lifetime of our luminaires. And we can customize the solution to your needs, protecting the luminaires even in harsh environments.

So you don't need to worry about maintenance costs.

### **QUALITY**

We are passionate about what we do. We accept nothing but the highest quality. That's why we design, develop, process and assemble all our luminaires in Denmark.

### **IMPROVE PERFORMANCE**

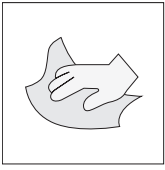

Our ATRIUM is different - in many ways:

- Only 6mm thin
  - easy to install with minimum space requirements
- Superb efficiency
  - reducing the amount of energy costs and number of light fittings
- High quality of light
  - excellent colour rendering and comfortable colour temperatures enable a safer working environment which allows employees to perform at their best
- Made in Denmark
  - All our luminaires are assembled in Denmark to ensure the highest build quality

We take time to listen to your needs, and put an honor in making the right solution. This is the reason why the ATRIUM product range offers lots of custom options.

# FEATURE OVERVIEW

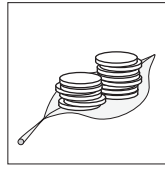

---

## EASY TO CLEAN

### Smooth surfaces

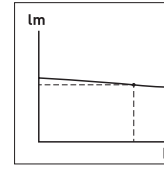

Dust not only looks terrible, it also influences the luminaire's performance. Our luminaires are smooth, and therefore easy to clean.

## SUSTAINABLE

### Saving money, energy & reducing CO2 emission

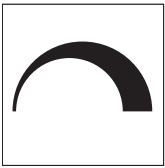

The high efficiency and competitive price offer huge savings on your energy bill, a fast ROI and contribute to a greener society by reducing CO2 emission.

## LONG LIFESPAN

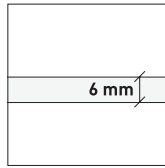

### L90 > 100.000 hours

The intelligent design of the LED iBond panels offers excellent heat transmission giving stability and a long lifetime.

## DIMMABLE

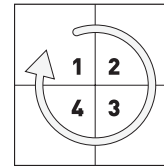

ATRIUM is compatible with most dimming and control systems, so it's possible to dim, manage and optimize your light and operation to your needs and to save energy.

## SUPER SLIM

### 6 mm LED panel

The LED iBond panels are not just slim – but extremely slim. With only 6 mm the impact on the visual environment is kept to a minimum.

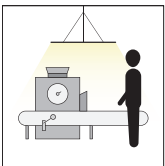

## EASY INSTALLATION

### Intuitive step-by-step

ATRIUM is very easy, fast and intuitive to install. It's plug-n-play, saving valuable time on site.

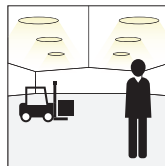

# APPLICATIONS

---

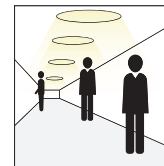

## PRODUCTION ENVIRONMENTS

Whether small workshops or large scale industrial areas – ATRIUM is flexible enough to cater for all production environments.

## WAREHOUSE ENVIRONMENTS

Powerful illumination helps to speed up picking processes, and the slim design makes it easier to operate forklifts and similar equipment.

## AMENITY AREAS

Wherever dark areas need to be brightened up, without breaking the bank – ATRIUM is your solution.

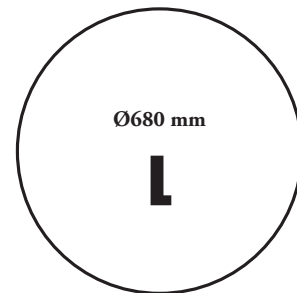

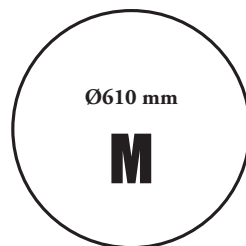

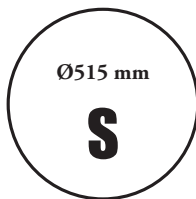

## PRODUCT RANGE

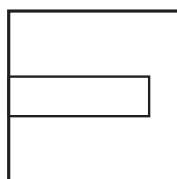

The ATRIUM product range offers 3 different lumen packages and comprehensive possibilities to protect the luminaire if needed.

LED iBond will help you plan and design the right solution for you. Just call, mail or stop by our office.
