## LED Upgrade panel

### OUR SOLUTION TO MAKE A MODERNIST CLASSIC EVEN MORE MODERN

We believe that the iconic design of the Lundtofte luminaire is worth preserving – not only would it be disruptive to exchange the luminaire itself in many cases, it would also be costly and not very ‘green’ (just imagine the amount of waste produced when replacing 500 or more luminaires in a building).

LED iBond has a solution: We manufacture tailor made LED upgrade panels for the Lundtofte luminaire, specifically designed for the ceiling mounted product. Utilizing our LEDACP technology, we build luminaires that are:

- Extremely easy to mount thanks to its small size
- High lumen output thanks to intelligent heat management
- Durable by design
- Fewer components mean an overall more sturdy product

- Intelligent heatsink design and extensive testing ensure a maintenance free product for years to come
- By using Aluminium Composite Panels we achieve a light yet rigid product
- High quality components from LED to driver
- Weakpoints of conventional LED fittings are eradicated – no conventional PCBs, no internal drivers
- Sustainable
- Amongst the best in its field for efficiency and low power consumption
- Fewer components mean a smaller ecological footprint
- Negligible use of increasingly rare raw materials such as copper

We cooperate very closely with our clients to create solutions that are right for them. Being able to either choose an off the shelf solution, or to closely look at particular project requirements, we can offer the right solution for the right price.

# FEATURE OVERVIEW

---

## EASY INSTALLATION

### Intuitive step-by-step

The Lundtofte LED Upgrade is very easy, fast and intuitive to install.

It's plug-n-play, saving valuable time and money.

## SUSTAINABLE

### Saving money, energy & reducing CO2 emission

The high efficiency and very competitive price offer huge savings on your energy bill, a fast ROI and contribute to a greener society by reducing CO2 emission.

## MAGNETIC CONNECTION

Once the cables are connected, the Lundtofte LED Upgrade attaches to the luminaire body with super-magnets – ensuring a strong connection whilst cutting down installation costs.

## DIMMABLE

LUNDTOFTE is compatible with most dimming and control systems, so it's possible to dim, manage and optimize your light and operation to your needs and to save energy.

## LONG LIFESPAN

### L90 > 100.000 hours

The intelligent design of the LED iBond panels offers excellent heat transmission giving stability and a long lifetime.

## EASY TO CLEAN

### Smooth surfaces, removable panels

Dust not only looks terrible, it also influences the performance of the luminaire. Our panels are removable, smooth, and therefore easy to clean.

## SUPER SLIM

### 6 mm LED panel

The LED iBond panels are not just slim – but extremely slim. With only 6 mm the unit sits lower than conventional lamps, enabling even and bright illumination.

## IP65

### Up to IP65

Our Lundtofte LED Upgrade is designed for outdoor use. That's why it's possible to get the LED panel with IP classification up to IP65.

# APPLICATIONS

---

## LED UPGRADE

This product is designed to upgrade luminaires, designed for conventional lamps, to the LED iBond technology.

## PRODUCT RANGE

The LUNDTOFTE product range offers 2 different color temperatures, a laminated panel for outdoor application and possibility to add a recommended LED

driver to the order.

We are also able to deliver new diffusers for the luminaires if needed.

### 1 CHOOSE COLOR TEMPERATURE

### 2 CHOOSE PROTECTION

### 3 CHOOSE ACCESSORY optional driver, recommended
