

Rail System Options

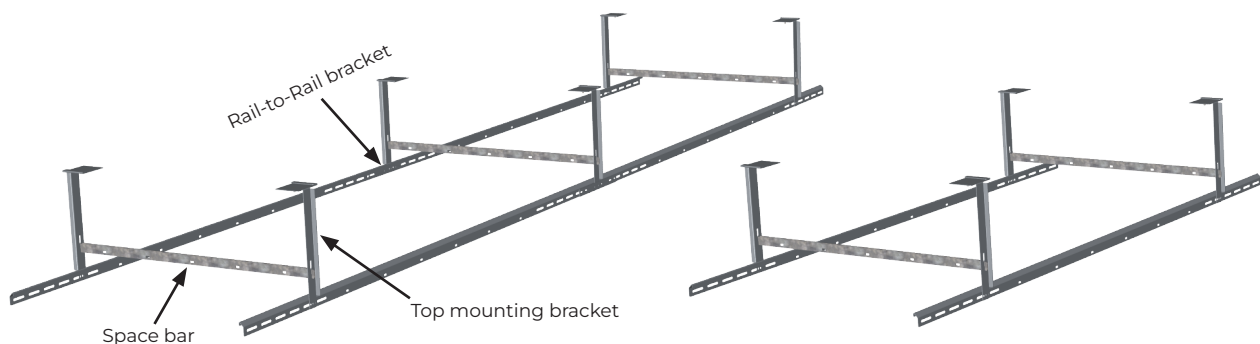

LED iBonds universal rail system for GRACY Horticulture lighting panels is a flexible solution and easy to install. The system is made of steel with a low weight but still highly robust due to inward formed flanges. The continuous perforation of the rails makes the system modular and gives maximum flexibility for sizing of the complete rail system for any grow area.

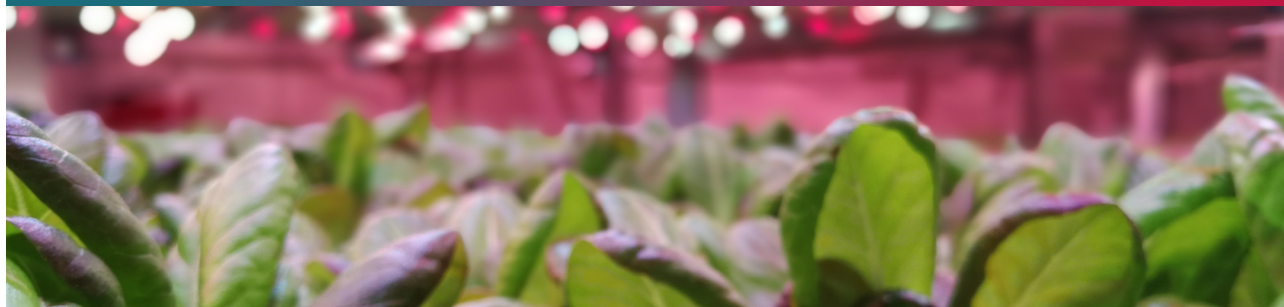

The design of the rail system and the panel glider being attached to the lighting panels allow for an easy slide-in installation. The panels can also easily slide-out (pulled out using the cabling attached to the lighting panels) when the panels may need to be removed for service or cleaning.

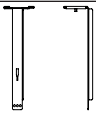

Complete Solutions

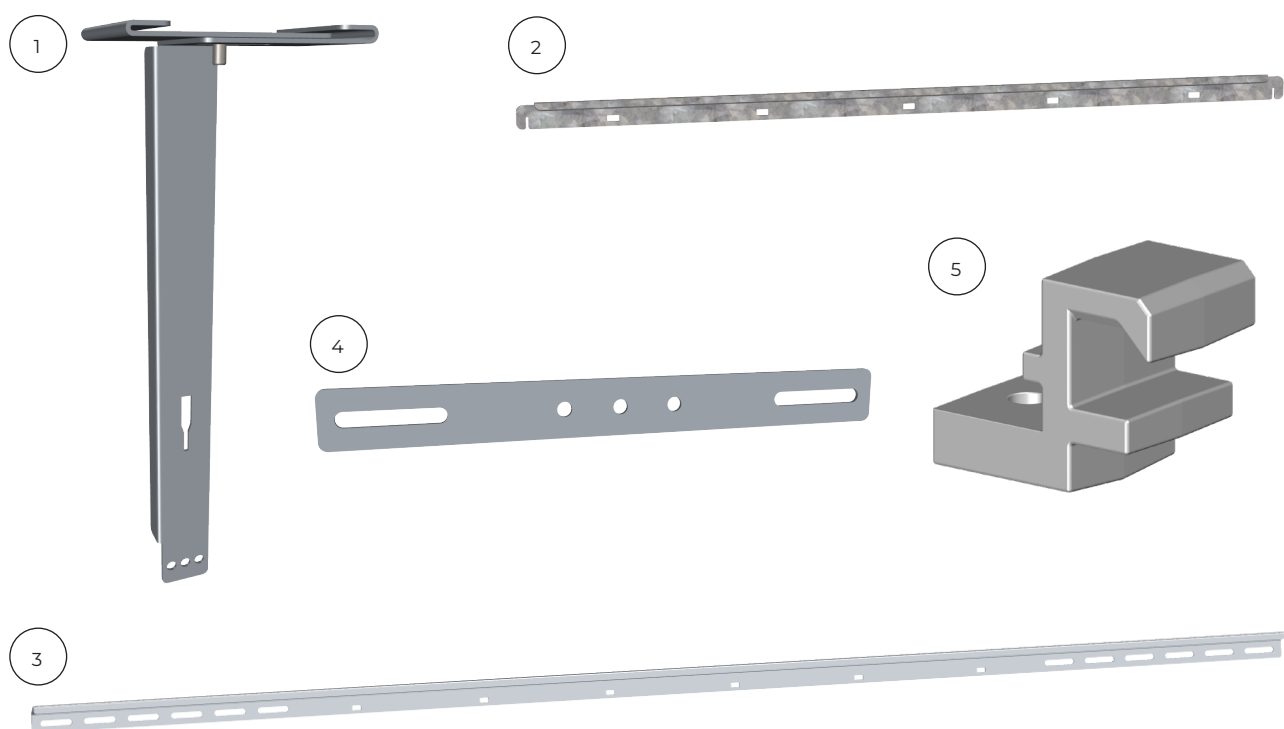

Product Description	Product Image	Dimensions [L x W x H]	Note
System option 1		3000 x 665 x 260 mm	Can hold up to 3 LED panels
System option 2		1500 x 665 x 260 mm	Can hold up to 2 LED panels

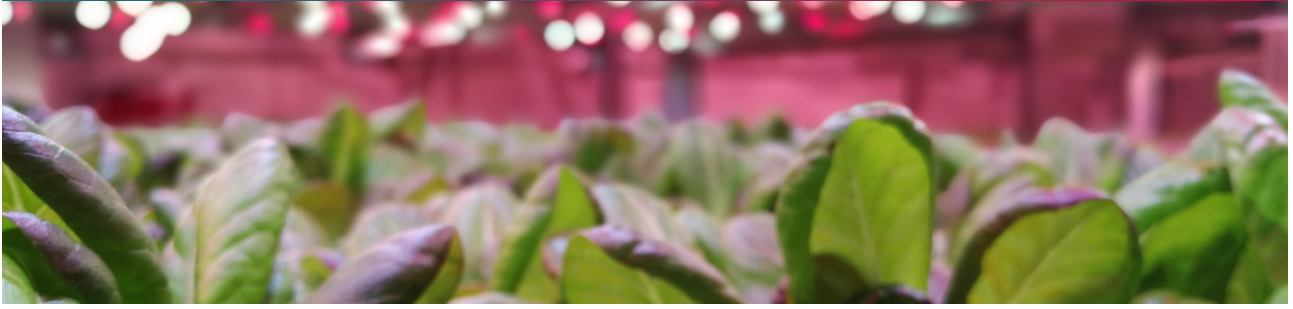

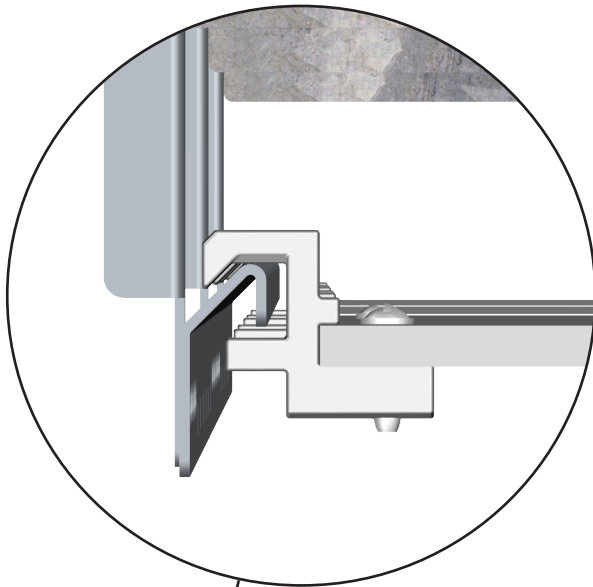

Rail Accessories

Product Description	Product Image	Dimensions [L x W x H]	Note
(1) Top mounting bracket		92 x 72x 260 mm	
(2) Space bar		660 x 8.50 x 22 mm	
(3) Rail		1500 x 12 x 30 mm	
(4) Rail-to-Rail bracket		200 x 1.50 x 20 mm	
(5) Panel glider		22 x 31 x 28 mm	4 pcs. for each LED panel

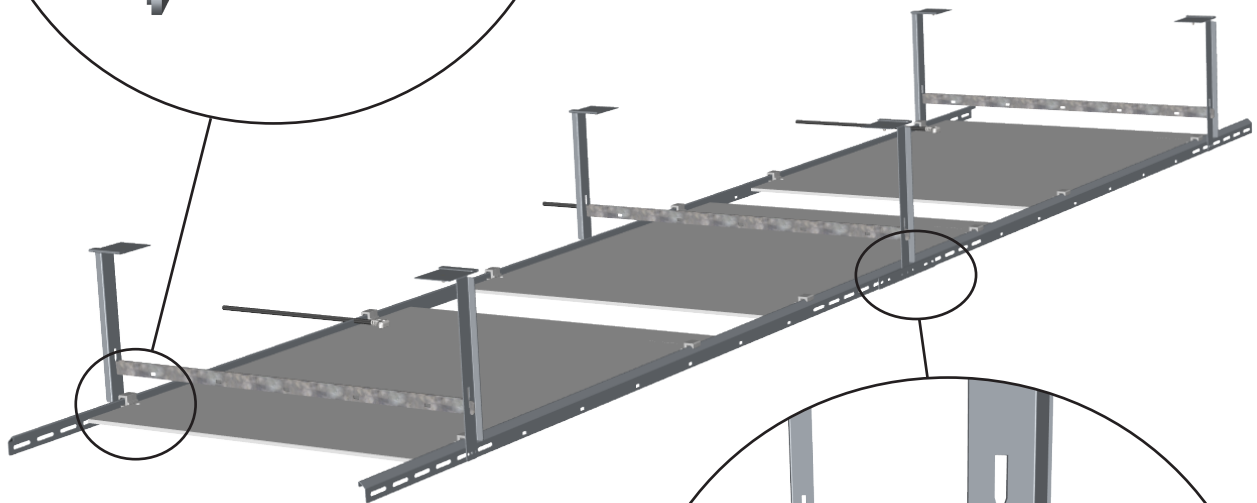

Rail System Solution

The Gilder when attached to the LED panel slides on the rail making the installation and service of the LED panels as quick and easy as possible.

The Rail-to-Rail bracket allow for the assembly of several rails making a complete system any desired length with support of many LED panels
