

Horticulture Lighting

For better yield and economy

The slim self-stabilizing linear light fixture replaces traditional toplights one-to-one

IP67

Water and dust resistant aluminum fixtures with acrylic protection lens designed for rough environments

LIGHT DISTRIBUTION

Excellent uniform light distribution for higher harvest yield

DIMMABLE

Adjustable light, lux and lumen via LED iBond Light Control or most common lighting/climate control systems

Light control via PC, tablet or mobile phone

Customizable light spectra and micromol

Easy installation directly in greenhouse structure

Reduced climate impact with energy efficient LEDs in recycable aluminum panels and less plastic

NEW
2nd
generation

HORTISABER - THE NEW GENERATION DISTRIBUTED TOPLIGHTING
