

Product Overview

LED iBond is specialized in developing and manufacturing innovative LED lighting solutions with high energy efficiency, recyclability and flexibility for selected business areas and private consumers.

Product Lines

TRACY® Industry

Slim IP67 rated linear interconnectable lighting panels with advanced control options.

TRACY® Home

Award-winning linear lighting solution for indoor lighting.

TRACY® Horticulture

Linear LED lights for indoor farming with customized grow light spectra and effective utilization of μmol and outstanding light uniformity.

GRACY Industry

Durable one-component light panel with integrated LED lights and optional sensors and control system.

GRACY Horticulture

One-component lighting panel with integrated LED lights with customized spectra for Vertical Farming.

HORTISABER Horticulture

2nd generation linear LED-toplights for Greenhouses.

Certification and compliance

LED iBond is compliant with the EU directive CE to meet high safety, health, and environmental protection requirements.

LED iBond is compliant with EU directive RoHS that restrains the use of certain dangerous substances in electronic products.

TRACY® and GRACY LED panels meets IP66 and IPX7 standard certifying that they are water-, sand- and dust-proof.

TRACY® is patented

EU:

Electrical Supply Module patent (EP3403024)

China:

China National Intellectual Property Administration (CN108700284)
